國麗化工

粉末塗料專業製造

國麗化工有限公司專門從事粉體塗料的製造及研發，已累積多年豐富經驗，並積極開創市場、建立口碑，有來自客戶群對品質的肯定與認同，除提供基本顏色符合市場需求，並針對金色、銀色、銅色、香檳及璀璨絢麗之珍珠色，生產設計出多樣色卡提供市場應用選擇。粉末塗料因具有環保、生產效率高，且可回收之優點，將其結合金屬、珠光、閃光等效果之金屬粉加工於物件上時，能為汽機車、運動器材、家電、儀器、傢俱等產品提供高質感金屬光澤，並兼具實用之裝飾性以及優越的保護功能。

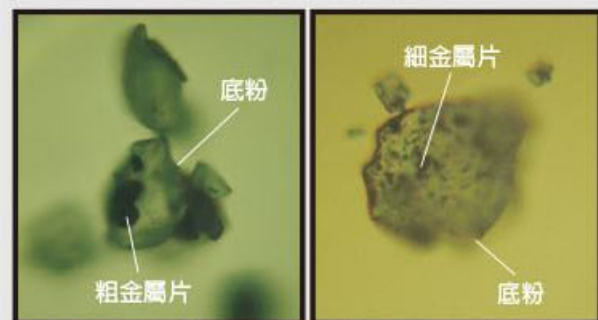

針對高金屬含量的產品，我們亦提供鍵結粉末塗料因應使用；
利用鍵結技術加工的粉末塗料具有數項優點：

1. 鍵結粉末塗料的色差小，金屬顏色均勻。
2. 回收粉與新粉的差異小，增加回收效率及使用穩定度。
3. 噴塗時不易有金屬團堆積和堵塞槍口的問題。
4. 降低靜電差異，減少霧化或噴塗造成的邊框色差問題。
5. 金屬顏料用量可更高，顏色設計可更接近液體漆色。
6. 底粉與金屬粉結合好，降低粉管漏電情形，提高上粉性。

應用市場參考：

- 腳踏車
- 燈具
- 運動器材
- 鋁鐵門窗
- 辦公傢俱
- 汽機車零件
- 工具五金
- 帷幕板屏風
- 家電用品
- 室內傢俱用品

Kwo Lin Chemical Co., Ltd. produce gold, silver, bronze, champagne and colorful dazzling pearl color charts for market applications. Powder coatings are easy to operate due to environmental protection, high efficiency, and recyclability. The metallic powder used for motor vehicles, fitness machines; sports equipment, household appliances, furniture and other high-end products can provide high performance metallic luster, colorful decoration and superior protection.

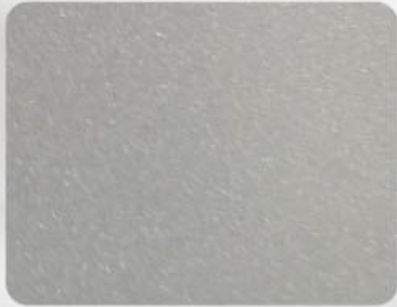

For high metal content products, we also provide bonding powders. The bonding technology on powder coating provides several advantages:

1. Bonding metallic powder coating's color is more uniformity.
2. Recycling powder between new powder difference is small, increase recovery efficiency and the use stability.
3. Spraying metallic cluster is not easy stacking and the muzzle is not jamming.
4. The bonding powder can reduce static difference, improves color uniform on the subject edge.
5. The metal pigment dosage can be higher, closer to the color design of liquid paint.
6. Base powder and metal pigment combine well, reduce electronic leakage situations of equipment, improve the powder adsorption properties.

Application Market Reference:

- Fitness machines
- Sports Equipment
- Automobile Parts
- Office Furniture
- Bike
- Furniture Supplies
- Lamps
- Hand Tools
- Hardware Appliances
- Aluminum windows
- Iron Doors

本公司產品依ISO9001認證品保進行

除此色卡外，
我們亦開發其餘機能性產品，歡迎洽詢。

- 金屬鍵結粉末塗料
- 易消氣孔粉末塗料
- 超耐候粉末塗料
- 耐溶劑粉末塗料
- 抗塗鴉粉末塗料
- 高硬度粉末塗料
- 低溫粉末塗料
