**Kwo Lin Chemical Co., Ltd.** is a professional manufacturer of powder coating. We are committed to provide customers with high quality coating products. We used architectural polyester resin to produce exterior products. Based on the popular new trend for architectural color, we develop a series of powder coating colors and patterns to provide a reference.

This product does not contain solvents, non-irritating volatile odor, free of harmful heavy metals, protect your health and safety, and of course environmentally friendly. There are matt, semi-gloss, high gloss choices in the flat parts. The structure coatings included hammer, texture, wrinkle and vein. These paints have excellent outdoor applicability, so they are well used in building materials applications and design reference.

New dull matt powder coatings were imitated the anode colors. These products have elegant color, smooth surface, no wax marks, and anti-fingerprints. Their outward appearances are easy to match with the natural environment, glass, tile walls, wood or other building materials.
